DETAILED ACTION

The response received 10/04/2010 has been placed in the filed and was considered by the examiner. Claims 7-14 are pending in this application.

Claims 7 and 9-14 are allowed with the following Examiner's amendment:

EXAMINER'S AMENDMENT

An extension of time under 37 CFR 1.136(a) is required in order to make an examiner's amendment which places this application in condition for allowance. During a telephone conversation with Attorney Scott Harris conducted on October 22, 2010, Attorney, Scott Harris requested an extension of time for ONE MONTH(S) and authorized the Director to charge Deposit **Account No. 50-4376** the required fee of **\$130.00** for this extension and authorized the following examiner's amendment. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Rewrite claims 7 and 10. Cancel claim 8 and amend claim 9 as follows:

Claim 7. (Currently Amended) A method, comprising:

mounting a plurality of truss mounted lamps by attaching each of said truss mounted lamps of the plurality of lamps to supporting trusses, wherein at least one of said supporting trusses extends in a different direction than another of said supporting trusses, wherein said truss mounted lamps are formed on a bracket which includes a truss mounted portion and lamp mounted portion;

using a graduated scale on each of a plurality of lamps to adjust a base position of each lamp, wherein said using comprises moving a truss mounted portion of the bracket relative to said lamp-mounted portion;

said graduated scale configured for allowing each of the plurality of lamps to point in the same direction,

wherein said using comprises using said graduated scale when said each of the plurality of lamps points in the same direction to have at least one value on one graduated scale of one of the lamps being different than a value on a graduated scale than another one of the lamps by an amount set on said graduated scale, whereby said graduated scales are arranged such that said mounting and said using controls all the lamps in the plurality of lamps to point in a common direction; and

receiving an electronic control signal which controls the plurality of lamps to move commonly as though each lamp was mounted on trusses extending in the same direction.

Claim 8. (Cancelled)

Claim 9. (Currently amended) A method as in claim 7, further comprising
securing said truss mounting portion relative to said lamp mounting portion after
adjusting the lamp.

Claim 10. (Currently Amended) A method, comprising:
attaching a plurality of lamps to a plurality of trusses wherein at least one of
said trusses extends in a different direction than another of said trusses wherein said
lamps are formed on a bracket which includes a truss mounted portion and a lamp
mounted portion;

loosening a connection between a connection to a truss and a connection to
the lamp;

adjusting an angle between the connection to the truss and the connection to
the lamp for at least some of the plurality of lamps by moving a truss mounted
portion of the bracket relative to said lamp-mounted portion, said adjusting causing a
group of said lamps to point in the same direction even though at least one of the
trusses holding said group of lamps extend in different directions than another of the
trusses holding said group of lamps; and

subsequently tightening the connection between the connection to the truss
and the connection to the lamp; and

receiving an electronic control signal which controls different lamps in the
plurality of lamps to move commonly based as though each of the plurality of lamps
was mounted oriented on a truss that extended in the same direction.

REASONS OF ALLOWANCE:

The following is an examiner's statement of reasons for allowance:

Claims 7 and 9-14 are allowable over the prior art references of record due to the combination of the recited claimed steps as specifically set forth in independent claims 7 and 10. Specifically, the prior art of record neither, separately or altogether, teaches or suggests the recited claimed steps of, among others, mounting a plurality of truss mounted lamps by attaching each of said truss mounted lamps of the plurality of lamps to supporting trusses, wherein at least one of said supporting trusses extends in a different direction than another of said supporting trusses; wherein said truss mounted lamps are formed on a bracket which includes a truss mounted portion and lamp mounted portion; using a graduated scale on each of a plurality of lamps to adjust a base position of each lamp; wherein said using comprises using said graduated scale when said each of the plurality of lamps points in the same direction to have at least one value on one graduated scale of one of the lamps being different than a value on a graduated scale than another one of the lamps by an amount set on said graduated scale; and receiving an electronic control signal which controls the plurality of lamps to move commonly as though each lamp was mounted on trusses extending in the same direction as specifically set forth in claims 7 and 10.

The closest prior art of record is Garrett et al. (US 5,432,691) or Mitchell (US 4,167,783). Garrett teaches an automated truss module with deployment mechanism

and/or Mitchell teaches a portable lighting system which includes stand which positions lights carried on a frame at a predetermined vertical position with respect to the support surface. Garret and Mitchell, however, does not teach device comprising the claimed method steps as specified above in claims 7 and 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to TAN LE whose telephone number is (571)272-6818. The examiner can normally be reached on Mon. through Fri. from 9:00 AM-6:00 PM.
